

## My Flora Nova

Thank you for downloading images from MyFloraNova.com

These sample images are provided to help you in visualising the picture, the composition, and its colours within your home or business environment. Please feel free to print the samples or share them with your family, friends, colleagues, or clients. The information below is to help you get the most out of your experience and to highlight some of the limitations in what can be experienced.

Some background information on the sample images:

- Main Image – This image downloads included are provided to help you visualise the overall composition of the final product within the environment you see it being located in. These images are intended to be printed on A4 size paper; whilst considerably smaller than the A2, A1, A0 sizes available for sale, they are however indicative of what you receive in your purchase.
- Detail Images – When printed on A4 paper, these are representative of the image as though it was printed on A1 size paper. If the product you are buying is different from A1 then the sample images provided need to be scaled accordingly. For example:
  - If you are considering an A2 sized print then scaling the image to 50% (i.e. print on only half of the A4 sheet) will give you the actual size as it would appear on the final product.
  - If you are considering an A0 sized print then scaling the image to 200% (i.e. only 50% of the sample image prints out on the A4 sheet) will give you the actual size as it would appear on the final product.

When printing the image samples at home, please consider the following:

- The images are formatted to fit onto A4 paper; printing on other sizes will give different outcomes to that intended. To get the best quality, please print on high quality glossy photo paper.
- The sample images can be provided for other paper sizes (e.g. Letter) upon request.
- If you are not able to get a good quality of print on your own equipment, consider using a photo-lab to print the image.
- The quality of the print you get will ultimately be dependent on a number of factors including paper type & quality, printer settings & calibration, and ink quality, etc. The samples provided should therefore only be considered as indicative of what the final product will look like.

The following points apply to the purchased images:

- The highest quality of paper is used; the paper profile is incorporated into the print process to ensure colour correctness and consistency of product.
- Only the highest quality professional inks are used.
- Under typical lighting conditions within the home or office environment, the colours will remain colourfast and vibrant for decades to come.
- The final product is of a higher resolution than the samples you are being provided with.
- The images are available in a number of finishes including print only, acrylic, etc. Please refer to the website for the options available.
- Watermarks do not appear on the purchased images.

Please contact us through the website [www.myfloranova.com](http://www.myfloranova.com) if you have any questions.
